

# Section V Exterior Paint Colors

While there is no absolute and exact list of colors that are approved for use in Sugar Hill, there is an understanding within the community of the colors that are acceptable.

The exterior paint colors will be in the gray, green, or brown spectrum. Because of the virtually unlimited minor color variations that may fall within an acceptable range, we chose to define the extremes of the color range. Paint or stain should be flat, satin, or semi-gloss. The following show acceptable ranges of each color.

Color	Lightest Shade		Darkest Shade

*[The Sherwin Williams colors have been added for convenience. They are not a part of the original document. They do not match the Benjamin Moore colors perfectly but they are as close as possible. The Benjamin Moore colors are the original document colors]*

Reference to a specific manufacturer's color, merely serves to identify the color and not to endorse the brand. Even within the paint color ranges, not all shades will blend with brick or stone, and not all color combinations will be acceptable. In all cases, the ACC will make the final decision as to the acceptability of a color, or the combination of colors.
